APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 18703, Certificate 5911, is issued subject to the terms and conditions imposed in said Permit 18703, Certificate 5911, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

A monthly report shall be submitted to the State Engineer within 10 days from the end of each month which shall include the amount of water pumped from the well and the amount of water used.

Temporary Permit 67452-T is limited to the irrigation of 101.99 acres within the described place of use.

The total combined duty of water under Permits 19750, Certificate 5927; 24013, Certificate 8286; 30068, Certificate 10419; 30263, Certificate 10703; 30521, Certificate 10423; and Temporary Permit 67452-T, and any waters of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 3,931.2 acre-feet per year for the irrigation of 982.8 acres. The permittee is responsible for insuring delivery of the entitled decreed and storage waters that are supplemental to these Permits. In any year that the Walker River Irrigation District declares a full allocation of decreed waters to the priority years of C-125 claims supplemental to these permits, underground water shall not be pumped from the wells described in these permits. In any year that the Walker River Irrigation District has no decreed or storage water, or declares a reduced allocation of surface waters to the priority years of C-125 claims supplemental to these permits, then the place of use of these permits can be irrigated with underground water, but not to exceed a duty of 4 acre-feet per acre per year from the total of decreed, storage, and underground waters.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **July 4, 2002** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.746 cubic feet per second, but not to exceed 407.96 acre-feet per season, and not to exceed a seasonal duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the seal of my office,

this 5th day of July, 2001

State Engineer

## Item 15. Remarks

The proposed point of diversion is the same as the well under Permit 19750. Phelps Dodge Corporation has an agreement to allow use of the well for irrigation of lands owned by Circle Bar N Ranch, during the upcoming irrigation season. The water under this application is to be limited to irrigation of 101.99 acres within the proposed place of use. The intent of the Applicant is to supplement surface water irrigation on land that is not currently being irrigated with other ground water rights. Please note that the proposed place of use includes 140 acres within the SW $\frac{1}{4}$ NW $\frac{1}{4}$  Section 4 and the NE $\frac{1}{4}$  Section 5, T.13 N., R.26 E., MDM, that have been temporarily removed from irrigation under Permits 67045T and 67046T.

Use proof of beneficial use map on file at the Division of Water Resources under Permit 18703 to support the existing point of diversion and place of use, proof of beneficial use map on file under Permit 19750 to support the proposed point of diversion, and the attached sketch to support the proposed place of use.
